PROFILE SUMMARY

Artificial Intelligence and Data Science undergraduate skilled in Generative AI, NLP, and Agentic AI. Experienced in Python, FastAPI, LangChain, LangGraph and building AI solutions for real-world applications.

EDUCATION

Koneru Lakshmaiah University (KL University) **Jul 2023 – May 2027 (Expected)**
B.Tech in Artificial Intelligence and Data Science (CGPA: 9.6/10) *Vijayawada, India*

PROJECTS

AI Project Mentor | Jun 2026
- **Technologies:** Python, FastAPI, Next.js, React, TypeScript, LangGraph, Groq, SQLite
- Built an end-to-end Agentic AI platform that generates domain-specific project recommendations, software architectures, implementation roadmaps, and technical reports.
- Designed a multi-agent workflow using LangGraph for research intelligence, project evaluation, decision-making, and automated report synthesis.
- Developed scalable FastAPI and Next.js applications with PDF generation, workflow automation, and persistent project history management using SQLite.
- Implemented LLM orchestration and domain-aware reasoning pipelines to transform user interests into industry-relevant AI solutions and actionable project plans.

Meeting Intelligence System | 2026
- **Technologies:** Python, Flask, Groq API, MySQL, HTML, CSS, Bootstrap
- Developed an AI-powered meeting intelligence system that analyzes meeting transcripts and generates structured reports.
- Implemented AI-based generation of meeting summaries, agendas, action items, assigned persons, and key decisions using LLMs.
- Integrated English and Japanese report generation with meeting history, dashboard, and action-item tracking features.
- Implemented input validation and prompt injection protection to improve application security and reliability.

LEAD AUTHOR - RESEARCH PAPER

"Integration of Artificial Intelligence with Triboelectric Nanogenerators: Toward Intelligent Self-Powered Sensors", Under Review, 2026.

TECHNICAL SKILLS

Programming Languages: Python, C

Web & Full-Stack Development: HTML, CSS, JavaScript, React, Next.js, TypeScript, FastAPI, Flask, Streamlit

Generative AI & Agentic AI: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Multi-Agent Systems, AI Workflow Automation

Natural Language Processing (NLP): Text Preprocessing, Tokenization, Named Entity Recognition (NER), Sentiment Analysis, Text Classification, Transformers

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Tableau

Databases & Tools: MySQL, ChromaDB, Git, Jupyter Notebook, VS Code, PyCharm

LEADERSHIP INVOLVEMENT

Collaborated on AI and Machine Learning projects, contributing to model development, experimentation technical problem-solving.

Pursuing Japanese language proficiency and represented the institution in South Zone Kabaddi competitions.

CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services

Japanese Language NAT-TEST Q5 Certification

Japanese Language NAT-TEST Q4 Certification
